

INVESTOR MASTER

Turn every company into an AI organization.

Two simple parts — the platform that runs a business, and the AI that operates it. Quickest builds it. Quickera runs it.

Prepared for Pre-seed / Seed investors · Focus Turkiye + global
June 2026 · invest@quickest.com · Confidential

1. What it is

01

Quickestest – the platform

The all-in-one platform that runs a business: store, CRM, booking, database and automation in one place.

02

Quickera – the AI layer

The AI on top – 40+ agents that operate the whole business, on its own data, 24/7.

03

One line

Quickestest builds it. Quickera runs it. (Quickestest kurar. Quickera yönetir.)

ONE PLATFORM, MANY PRODUCTS – ALL RUN BY ONE AI BRAIN

Quickera

CRM

Shop

Business

Cloud

Flow

Base

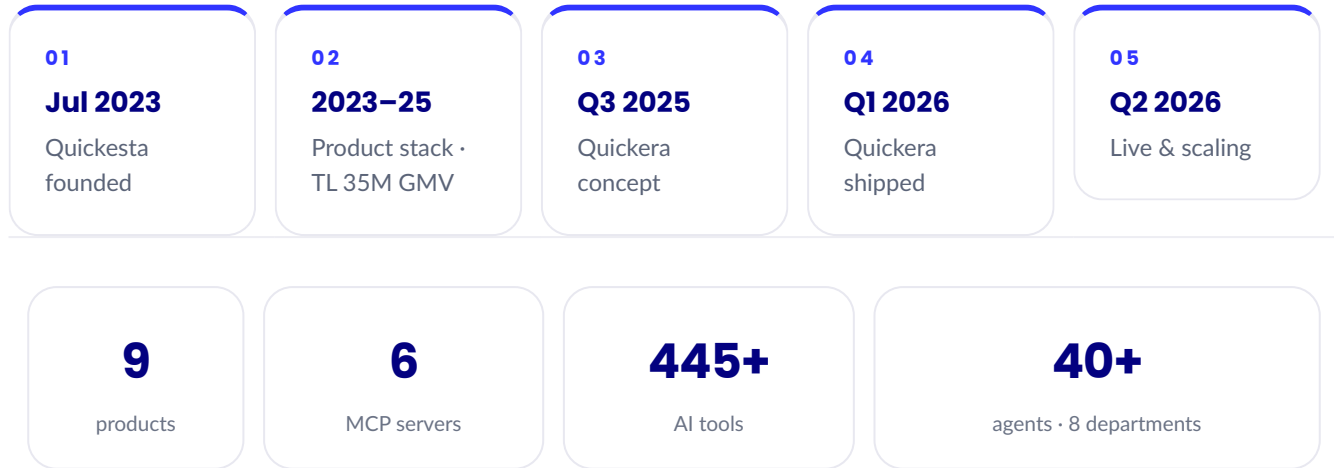

Studio

The opportunity: 3.5M+ Turkish SMEs drown in disconnected tools and can't afford staff. We give every company an AI department that runs on its own data.

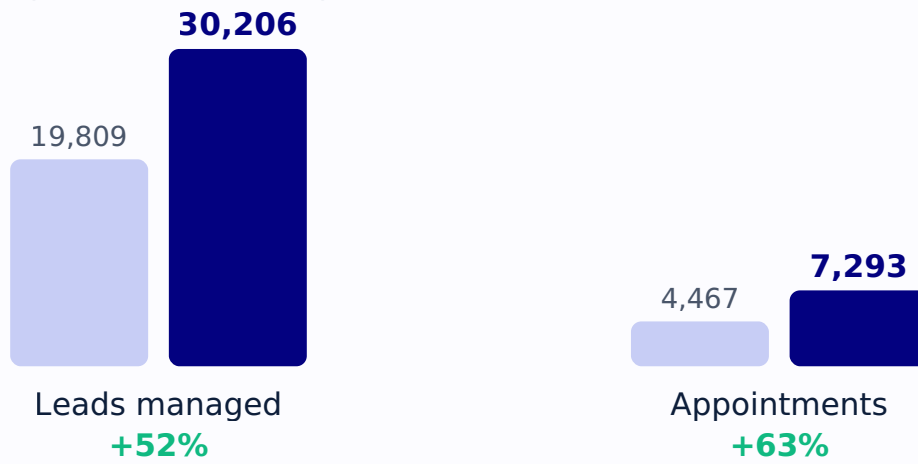

2. Two years of real product. Then AI on top.

Quickestest launched July 2023 and built the product stack + TL 35M in customer volume. In Q3 2025 we turned that data into a Company Brain and agents-by-department – Quickestest shipped Q1 2026. AI was layered on top of the data, not the other way around.

3. Live and growing

Apr → Jun 2026 · □ Apr ■ Jun

Organic growth in a single quarter (Apr → Jun 2026), from the production database. "Leads managed" is customer data managed on the platform – not our own users.

110M+

operations executed

platform users

PLATFORM VOLUME **NOT OUR REVENUE**

~TL 35M real transaction volume managed on the platform (collections & bookings) – customer money, not ours.

OUR REVENUE **REALIZED**

\$35K+ cumulative since Q2 2024 (mostly one-time) · ARR approaching ≈\$20K (≈TL 1M), recurring as subscriptions ramp. ~\$6K ARR per customer potential.

Single codebase, multi-tenant – low marginal cost per customer.

4. The ask

\$500K–\$1M

Pre-Seed round

3.5M+

Turkish SME market

L3 today

autopilot agents, L4 the direction

invest@

quickest.com

To accelerate the AI agent, Türkiye connectors, and the first 500 customers.

01

Launch UX

One-click "apply" + "describe it, AI builds it" demo.

02

Proactive AI

Briefings & actions — the agent acts before you ask.

03

Türkiye + local LLM

Parasut, iyizico connectors; on-prem / local LLM option.

Why us: we own the product stack AND the AI orchestration — 9 products, 6 MCP servers, 445+ tools, one Company Brain. Models & MCP are commodities; the unified data layer is the moat.

Confidential. Built from Quickest/Quickera production data & the company data sheet (June 2026). REALIZED vs EXPECTED and platform-volume vs our-revenue are labelled throughout. USD ≈ TRY/50 (approximate). Not investment advice.
